

A Message from our Health Director

Everyone in our community is now eligible for a COVID-19 booster shot if enough time has elapsed since their last shot. Although the College is **not requiring proof of a booster** shot at this time, I/we strongly encourage you to get your booster as soon as you are six months from your last Moderna or Pfizer vaccination, or two months from your Johnson & Johnson vaccine. You should get it before or during the winter break if at all possible.

You can find information here: <https://www.vaccines.gov/>

Each state will typically have information on the [state.gov](https://www.state.gov/) website as well. If you are looking to get your booster in Massachusetts, for example, check this site: <https://www.mass.gov/info-details/covid-19-booster-frequently-asked-questions>. You can find locations and schedule your booster at vaxfinder.mass.gov.

After receiving the booster, please scan a copy of your updated vaccination card and send it to sheryl.max@montserrat.edu.

Please feel free to reach out with any questions/concerns.

Be Well,
Sheryl Max RN
