China, Hong Kong	Guinea-Bissau	Mauritania	Russian Federation	Zimbabwe

If the answer to **any** of the above questions is **YES**, the Massachusetts Department of Public Health **strongly recommends** that you have a tuberculin skin test to check for latent tuberculosis infection. If the answer to **all** of the above questions is **NO**, a tuberculin skin test should not be done. **Please note: If you have had a positive tuberculin skin test in the past, you do not need another test.**
